

# GET THE FACTS. AND GET THE SHOT.

SERIOUS COMPLICATIONS OR DEATH CAN NOW BE AVOIDED  
for most with the use of **COVID-19 vaccines.**

We all know why it's important to get vaccinated against COVID-19. And we know that the vaccines and boosters that are available have proven to be effective in decreasing the likelihood of infection by the virus and reducing the effects of Coronavirus if you are infected. Yet, some people might be hesitant to get the vaccine because they aren't sure it's safe.

The fact is, for most people **it is absolutely safe to get vaccinated against COVID-19.**

## VACCINE FACTS

- FACT 1:** COVID-19 vaccines were developed using science that has been around for decades.
- FACT 2:** COVID-19 vaccines are safe and meet the Food and Drug Administration's (FDA's) rigorous scientific standards for safety, effectiveness, and manufacturing quality.
- FACT 3:** COVID-19 vaccines are effective at preventing severe illness and hospitalizations from COVID-19 and limiting the spread of the virus that causes it.
- FACT 4:** Millions of people in the United States have received COVID-19 vaccines.
- FACT 5:** COVID-19 vaccines are monitored by the most intense safety monitoring efforts in U.S. history.
- FACT 6:** CDC recommends COVID-19 vaccines for everyone ages 6 months and older, and boosters for everyone 5 years and older, if eligible.
